SUBJECT INDEX

Abdominal ventilation,
  and CNS warming in the cricket, 185
Acclimation,
  and feeding in toads, 73
  and goldfish brain mitochondrial phospholipid composition, 61
  effect on blood lactate levels in a lizard, 37
  effect on energy intake and protein metabolism in pigs, 79
  effect on glycolysis in a lizard, 37
  effect on metabolic rate in a lizard, 37
  effect on supercooling points in land snails, 163
  seasonal in *Phodopus*, 49
  to heat and evoked potentials in rat auditory nerve preparations, 175
Amphibia, 73
Anaerobic scope,
  and acclimation in a lizard, 37
Anguispira alternata, 163
Artemia sp., 119, 125
Arthropod cuticle,
  driving forces for water permeability of, 157

Basking behaviour,
  and thermal balance in raccoon dogs, 169
Behavioural thermoregulation,
  and gestation time in a lizard, 135
  in a digger wasp, 15
Bird, 43, 89, 103
Body size,
  and scaling of thermal conductance, 103
Body temperature,
  and drinking water temperature in hens, 43
  and exercise in DNP treated rats, 189
  and leg cooling in hens, 43
  and prolactin secretion in heat stressed goats, 53
  effect of ambient temperature and draught on in pigs, 1
  in homeotherms, strategy for conservation of water and energy, 9
  in long-eared bats, 25
  in men during atropine and/or pralidoxime treatment, 67
  of rats in hypergravic fields, 93
Brown adipose tissue,
  and cold acclimation in guinea pigs, 143
Bufo americanus, 73

Callipepla gambelii, 89
Capara hircus, 53
Carassius auratus, 61
Carpodacus mexicanus, 89
Cavia aperea porcellus, 143
Central nervous system,
  selected warming of and ventilation in the cricket, 185
Coat,
  quality and rearing temperature in mice, 21
  structure and basking behaviour in raccoon dogs, 169
  thermal conductance of birds, 89
Cold acclimation,
  and body temperature in hypergravic rats, 93
  exercise and adaptation in guinea pigs, 143
Cold hardiness,
  in several land snail species, 163
Cold resistance,
  of NST in Djungarian hamsters, 49
Crustacea, 119, 125
Cryptobiosis, 119, 125
Cuticle,
  driving force for water permeability of, 157

Development,
  and ambient temperature in a lizard, 135
  effect of temperature on in a tropical moth, 149
  effect on temperature on in chironomids, 31
  of warmth sensation in children, 85
Discus cronkhitei, 163
Djungarian hamsters, 49
Draught,
  effect on body temperature in pigs, 1
Drugs, 49, 53, 67, 189

Effective temperature, 67
Energy,
  balance and temperature in a tropical moth, 149
  expenditure, effect of temperature on in a chironomid, 31
  intake and ambient temperature in pigs, 79
  strategies for conservation of in homeothermy, 9
Evaporation,
  respiratory and body temperature in hens, 43
Exercise,
  and acclimation in a lizard, 37
  and body temperature in DNP treated rats, 189
  and metabolic adaptation to cold in guinea pigs, 143
  and thermoregulation in man, 67

Feathers, 89
Feeding behaviour,
  and acclimation in toads, 73
Fish, 61

Gallus domesticus, 43
Gastrocopta armifera, 163
Gestation,
  effect of temperature on in a viviparous lizard, 135
Glycolysis,
  in lizards and acclimation, 37
Gryllus bimaculatus, 185

Hair,
  and rearing temperature in mice, 21
Heat exchange,
  and body size, 103
  in bird plumage, 89
  in man during exercise and drug therapy, 67
Heat exposure,
  effect on evoked potentials of rat auditory nerve, 175
Heat flow,
  through avian plumage, 89
Heat production,
  and leg cooling and drinking water temperature in hens, 43
  and the climatic environment in pigs, 1
  in seasonally acclimated *Phodopus*, 49
Heat shock,
  and thermotolerance in *Artemia*, 119, 125
Heat shock proteins,
  and cryptobiosis in *Artemia*, 125
Heat stress,
  and behavioural thermoregulation in a digger wasp, 15
  and body temperature in goats, 53
  and DNP treatment during exercise in rats, 189
  in laying hens, 43
Heat transfer,
  through avian plumage, 89
Helicodiscus parallelus, 163
Hibernation,
  in desert lizards, 37

Homeotherms,
body temperature strategies of, 9
Homeoviscous adaptation,
and goldfish brain mitochondrial membranes, 61
Hormones,
prolactin and thermoregulation in goats, 53
thyroid and NST in *Phodopus*, 49
Hypergravic exposure,
and thermoregulation in rats, 93

Insect, 15, 31, 149, 157, 185
Insulation,
and body temperature in homeotherms, 9
of bird plumage, 89

Kiefferulus barbitarsis, 31

Leg cooling,
and thermoregulation in hens, 43

Mammal, 1, 21, 25, 49, 53, 67, 79, 85, 93, 143, 169, 175, 189, 197
Man, 67, 85
Metabolism,
and acclimation in desert lizards, 37
and thyroid hormones in *Phodopus*, 49
effect of exercise on adaptation of to cold in guinea pigs, 143
effect of temperature on during development in a chironomid, 31
Microhabitat selection,
and thermal stress in a digger wasp, 15
Mitochondria,
effect of acclimation on phospholipid composition of from goldfish brain, 61
enzyme activity of and cold acclimation in guinea pigs, 143
Model,
for heat transfer in the raccoon dog and blue fox, 169
for scaling thermal conductance and body size, 103
Mollusc, 163
Mus musculus, 21, 197

Naja naja, 179
Non-shivering thermogenesis,
capacity for in seasonally acclimated *Phodopus*, 49
Noradrenaline,
and cold acclimation in guinea pigs, 143
and NST in seasonally acclimated *Phodopus*, 49
Nyctereutes procyonoides, 169

Offspring viability,
and gestation temperature in a viviparous lizard, 135

Pericallia ricini, 149
Philanthus psyche, 15
Phodopus sungorus sungorus, 49
Phospholipid,
goldfish brain mitochondrial and acclimation, 61
Pinnae,
position and thermoregulatory status in bats, 25
Plecotus auritus, 25
Plumage, 89
Prolactin,
role in thermoregulation in goats, 53
Protein metabolism,
and ambient temperature in pigs, 79
Ptyas korros, 179

Rattus sp., 93, 175, 189
Reproduction,
effect of temperature on in viviparous lizard, 135
Reptile, 37, 103, 135, 179
Respiratory frequency,
and drinking water temperature in hens, 43
and leg cooling in hens, 43
and warming of CNS in crickets, 185
in heat-stressed goats, 53

Scleporus jarrovi, 135
Sex ratio,
influence of gestation temperature on a lizard, 135
Suis suis, 1, 79
Supercooling point,
and season in land snails, 163

Thermal comfort,
effective temperature as an index for, 67
estimation of in children, 85
Thermal conductance,
and body size, 103
Thermoregulation,
and homeothermy, 9
a putative role for pinnae position for long-eared bats, 25
during exercise and drug therapy in man, 67
in hens, 43
in rats during exercise and DNP treatment, 189
in rats exposed to hypergravic fields, 93
role for prolactin in heat-stressed goats, 53
role of pinnae in mice, 197
Thermosensitivity,
of CNS in *Gryllus*, 185
Thermotolerance,
in *Artemia*, 119, 125
Thyroid hormones,
and capacity for NST in *Phodopus*, 49
and intermediary metabolism in snakes at low temperature, 179
Torpor,
in brown long-eared bats, 25
Toxostoma dorsale, 89

Urosaurus graciosus, 37
Urosaurus ornatus, 37

Warmth,
development of sensation of, 85
Water,
conservation and thermoregulation in homeotherms, 9
flux, driving force for through insect cuticle, 157
intake and thermoregulation in goats, 53

AUTHOR INDEX
